

AJA Child & Adolescent Day Treatment provides year-round, structured therapy to change problem behaviors.

Our year-round program provides treatment for problem behaviors that could worsen without the Level I therapeutic treatment AJA CADT provides.

AJA Child & Adolescent Day Treatment offers individual, group and family therapy, in addition to nursing and psychiatric services for children ages six through 14.

The behavioral issues targeted include:

- * Poor Anger Control
- * Anxiety
- * Mood Swings
- * Short Attention Span
- * Hyperactivity
- * Defiance
- * Impulsivity
- * Aggression
- * Failing Grades
- * Poor Social Skills

Throughout the year, AJA CADT addresses such behaviors that critically affect a child's ability to function in school and at home. Our staff works closely with parents, the school and community resources in order to facilitate change.

Half-day sessions are held from 8 a.m. to 11:30 a.m. and from 12:30 p.m. to 4 p.m.

Since 2005, AJA Child & Adolescent Day Treatment (AJA CADT) has been providing therapy for children and teens with behavior problems by providing effective therapy through its half-day program, Monday through Friday, 8 a.m. to 11:30 a.m. and from 12:30 p.m. to 4 p.m.

Our program focuses on working with children, families and the community to help children "stay in school, stay at home and stay out of trouble." We do this by providing a comprehensive, nurturing, strength-based, culturally appropriate and therapeutically sound program for males and females, ages 6 to 14. AJA CADT is the only minority provider of child and adolescent day treatment services in Milwaukee County. We also are the only day treatment program that can boast of having two board-certified psychiatrists, one of which is African American.

Our goal is to enhance the ability of children and families to communicate, problem-solve, make good decisions and develop coping skills that can be used at home, school and in the community, and to teach children alternative ways to express feelings, resolve conflicts and manage their emotions.

Our treatment team is comprised of two board-certified psychiatrists, master's level therapists, group therapists, a registered nurse and a team of mental health technicians.

AJA CADT accepts straight Title-19 health insurance, which covers transportation costs. Breakfast is provided during the morning session and snacks are available during both sessions.
